To Whom It May Concern

Caribbean Export Development Agency (Caribbean Export) is pleased to be associated with the new Sanch Electronix Limited initiative, 'Pan in Education'.

The project aims to nurture and enhance the development of a structured Caribbean music industry, beginning in the classroom. It will deliver a new generation of innovators and entrepreneurs for production of sustainable, globally competitive cultural products.

The award of a grant under the Direct Assistance Grant Scheme confirms Caribbean Export's commitment to assist in financing the development and implementation of 'Pan in Education'.

The Direct Assistance Scheme is funded by the European Union 9th European Development Fund and provides assistance to CARIFORUM firms to address the constraints they encounter as they enhance their capacity, develop new products and services or access regional and international markets.

Caribbean Export congratulates Sanch Electronix Limited for being innovative and seeking to enhance the learning of Caribbean music as well as promoting the region's musical culture.

Sincerely,

Kirk C. N. Brown
Senior Grant Advisor
